GitHub, Jira, Postman, Trello, CRXDE, ActiveCampaign, React Testing Library

## EDUCATION

**Bachelor of Engineering (Electronics and Telecommunication), MIT, Pune**

2016 – 2020

## CERTIFICATES

**Adobe Certified Professional - Adobe Experience Manager Developer certification** 📄

October 12, 2022

## INTERESTS

Travelling | Reading

## PROFESSIONAL EXPERIENCE

**Senior Software Developer (ReactJS, NodeJS), The Cloudfountain**

04/2023 – present | Pune

### Product Name: Everyday Life Insurance

- Developed a full-stack web application and reporting tool with ReactJS and NodeJS.
- Designed and implemented advanced reporting features with dynamic filters and downloadable reports.
- Integrated multiple insurance carrier APIs and ActiveCampaign for seamless data processing.
- Handled AWS deployments, production issues, and real-time monitoring using CloudWatch.
- Worked extensively with AWS Lambda, RDS, and DynamoDB for backend processing and storage.
- Collaborated with cross-functional teams to optimize user experience and backend efficiency.

**AEM Developer, LTIMindtree**

04/2022 – 04/2023 | Pune

### Project name: Ministry of Corporate Affairs

- Built AEM components, templates, workflows, and forms using AEM Forms.
- Integrated WSO2 and Siebel APIs, reducing data retrieval time by 25%.
- Led on-site technical collaborations with clients and business teams in New Delhi for four months.
- Designed and configured AEM packages and managed backend API integrations.
- Worked with Servlets, HTL, JavaScript, CSS, JSON, AJAX, and REST APIs to build scalable solutions.

**Software Engineer (ReactJs), LTIMindtree** 📄

10/2020 – 04/2022 | Pune

### Project Name: AIR Lite(Absa Internet Banking)

- Developed secure, responsive banking UI using ReactJS for internet banking.
- Integrated bill payment and fund transfer interfaces with backend APIs.
- Handled secure API authentication, session management, and authorization flows.
- Debugged and resolved production issues, improving application stability.
- Collaborated with backend teams for API specifications, sprint planning, and agile ceremonies.
- Wrote unit and integration tests using React Testing Library to validate UI components and API interactions, improving test coverage and reducing production issues.
